Group One Presentation

Our Roles

Bakytov Yelnur
Team Leader, Fullstack Developer

Park Yuhan
AR/VR specialist

Lee Changkyu
Fullstack developer

Jung Da Han
VR specialist

Ibrokhimov Jakhongir
Front-End and AI developer

01
Project purpose

Develop a platform for creating **dinamic stories** using augmented reality (AR) elements.

And here's our idea!

Our idea is to create an exciting experience for the visitors of the Children's Park through an interactive AR guide.

Functionality

Children's Park Tour: Experience magic with augmented reality objects. Explore the park and enjoy immersive storytelling in AR.

Park Zoo: Immerse yourself in a virtual world of animals using A-Frame.js. Gain insights into different species and their habitats through informative content delivered via AR.js.
